SUBJECT INDEX

Adriamycin
spectroscopic studies of the interaction of adriamycin with lanthanide(III) ions, 400
Alkoxides
preparation of ceric alkoxides in glycol ethers, 335
Alloys
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
microstructure and coercivity in high iHc $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
microstructural studies of ternary rare-earth–iron alloys, 107
preparation of elements and alloys, 133
substituent effects in $Nd_2Fe_{14}B$-based alloys interpreted on a crystal field model, 35
α-lactalbumine
direct evidence of three different metal-binding sites in α-lactalbumine, 401
Aluminium
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Aluminium(III) oxide
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Americium
studies of Am^{3+} in aqueous solution, 301
Aminopolycarboxylates
lanthanide(III)-aminopolycarboxylates: kinetic properties and ternary complexes, 395
Analysis
phonon interference in the analysis of rare earth $4f^n$ energy level sequences, 239
Application
review and prospects of the application of rare earths in iron and steel in China, 137
Autoradiography
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63

Borides
structural properties of $R_{1+x}Fe_4B_4$ compounds, 138
Boron
rare-earth–transition-metal–boron permanent magnets with smaller temperature coefficients, 95
Bromopyrogallol Red
use of cetyltrimethylammonium bromide in the solvent extraction of lanthanoid complexes of Bromopyrogallol Red and spectrophotometric determination of lanthanoids, 398

Cadmium
comparison of lanthanide(III) and Cd(II) as Ca(II) models: metal-ion induced conformational changes in spin-labeled calmodulin, 343
Calixarenes
lanthanide complexes of crown ethers, calixarenes and cyclodextrins: coordination versus inclusion, 396
Calcium(II) models
comparison of lanthanide(III) and Cd(II) as Ca(II) models: metal-ion induced conformational changes in spin-labeled calmodulin, 343
Calmodulin
comparison of lanthanide(III) and Cd(II) as Ca(II) models: metal-ion induced conformational changes in spin-labeled calmodulin, 343
Catalysis
role of the lanthanides in applied catalysis, 101
Catalysts
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89

0022-5088/86/$3.50

Cerium
cerium: existing and future markets, 136
determination of Ce, Eu and Tb in rare earth matrices by DCP–AES, 291
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
electronic Raman scattering in Ce^{3+}/$LuPO_4$, 302
preparation of ceric alkoxides in glycol ethers, 335
solid solubility of La, Ce, Nd and Y in iron, 136
Characterization
chemical and *in vivo* characterization of Gd chelates, 404
China
review and prospects of the application of rare earths in iron and steel in China, 137
Circularly polarized luminescence
anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers, 402
CPL of Sm(III): comparison of experimental and calculated emission (CPL and TL) spectra of $Na_3[Sm(ODA)_3]\cdot 2NaClO_4\cdot 6H_2O$, 303
Coercivity
coercivity in rare earth magnets, 133
microstructure and coercivity in high iHc $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
Complexation
complexation differences between lanthanide nitrates from spectroscopic measurements in water, 315
Complexes
lanthanide coordination chemistry: polypyrazolylborate and polyimidazolylborate complexes, 404
synthesis and properties of the complexes of rare earths(III), bidentate heterocyclic amine ligands and trichloroacetic acid, 403
Complex formation
metal complex formation with 1,7-diaza-4,10,13-trioxacyclopentadecane-*N,N'*-diacetic acid, 396
rare earth fluoride solubilities, complex formation and thermodynamic functions for the solution process, 401
Contact shifts
lanthanide-induced contact shifts – new values for $\langle S_z \rangle$
Crown complexes
luminescence of divalent europium crown complexes in various solvents and at various temperatures, 147
Crown ethers
anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers, 402
extraction of trivalent actinides and lanthanides by mixtures of HDDNS and crown ethers, 399
lanthanide complexes of crown ethers, calixarenes and cyclodextrins: coordination versus inclusion, 396
Cryogenics
cryogenic luminescence studies of YOCl:Eu with the YOF-type and PbFCl-type structures, 175
Cryptates
solid state and solution structures of the lanthanide (2.2.1) cryptates, 400
Crystal-field correlation
ab initio calculation of crystal-field correlation effects in Pr^{3+}–Cl^-, 301
Crystal-field levels
assignment of crystal field levels of Er oxalate trihydrate, 304
Cyclodextrins
lanthanide complexes of crown ethers, calixarenes and cyclodextrins: coordination versus inclusion, 396
Cyclopentadienyl
interpretation of the magnetochemical, EPR and NMR spectroscopic properties of adducts derived from tris(cyclopentadienyl)lanthanide(III), 304
synthesis and cyclic voltammetric study of bis(pentamethylcyclopentadienyl) neptunium dichloride, 411
synthesis and disproportionation of mixed ligand Yb organometallics involving cyclopentadienyl and β-diketonato chelate ligands, 417
synthesis of dicyclopentadienyl Yb benzoate derivatives, 418
thermal stability studies of dicyclopentadienyl samarium acetate and halides, 405

Determination
determination of Ce, Eu and Tb in rare earth

matrices by DCP–AES, 291
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
Dimethylsulphoxide
FT–IR investigation of the interaction between dimethylsulphoxide (DMSO) and some lanthanide nitrates in acetonitrile solutions, 379
Dipicolinic acid
effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid, 300
Direct current plasma atomic emmision spectroscopy determination of cerium, europium and terbium in rare earth matrices by DCP–AES, 291
Disproportionation
synthesis and disproportionation of mixed ligand Yb organometallics involving cyclopentadienyl and β-diketonato chelate ligands, 417
Dissociation kinetics
dissociation kinetics of 1,7,-diaza-4,10,13-trioxacyclopentadecane-*N,N'*-diacetic acid complexes of lanthanides, 396
Dyeing
exploration of the function of rare earths in the dyeing of woollen yarn, 357
Dysprosium
analysis of the spectrum of Dy^{3+}:LaF_3 assuming a C_2, site symmetry, 283
long-range incommensurate magnetic order in Dy–Y multilayers, 53

Electronic relaxation
electronic relaxation of $^3P_0$ and $^1D_2$ states of Pr(3+) in $POCl_3$:$SnCl_4$, 169
Electronic structure
electronic structure calculation on rare earth iron boron intermetallic compounds, 138
electronic structure of organoactinide complexes containing metal–metal bonds, 416
electronic structure of $Sm(DBM)_3{\cdot}H_2O$, 302
microstructure and coercivity in high *iHc* $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
Electron paramagnetic resonance
interpretation of the magnetochemical, EPR and NMR spectroscopic properties of adducts derived from tris(cyclopentadienyl)lanthanide(III), 304
Electron transfer
electron and energy transfer processes of excited states of Eu(III) and Tb(III) aquo ions and cryptates, 329
electron transfer chemistry of divalent Yb metallocenes, 415
Electron trapping
electron trapping, trapped excitons and the stability of divalent rare earth ions in host crystals, 297
Energy
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
Energy storage
fluoride glasses as optimized materials for lanthanide luminescence and energy storage in Mn(II), 181
Energy transfer
electron and energy transfer processes of excited states of Eu(III) and Tb(III) aquo ions and cryptates, 329
identification of the mechanism for phonon-assisted energy transfer, 299
study of the energy transfer processes in sensitized Gd phosphors, 139
Erbium
assignment of crystal field levels of Er oxalate trihydrate, 304
fluorescence dynamics in $LiYF_4$:Er^{3+} and $LiErF_4$, 203
interaction and intensity parameters for Er(III) in certain acetate, nitrate and sulphate complexes, 233
spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glasses, 257
Europium
anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers, 402
anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers, 402
cryogenic luminescence studies of YOCl:Eu with the YOF-type and PbFCl-type structures, 175
determination of Ce, Eu and Tb in rare earth matrices by DCP–AES, 291
dynamic ligand polarization contributions

to 4f → 4f magnetic dipole transition moments and rotatory strengths: $^7F_0 \rightarrow {}^5D_2$ and $^7F_2 \rightarrow {}^5D_0$ transitions in Eu(oxydiacetate)$_3^{3-}$, 251
electron and energy transfer processes of excited states of Eu(III) and Tb(III) aquo ions and cryptates, 329
energy levels of Nd^{3+} and Eu^{3+} in zircon- and monazite-type structures, 302
intensity parametrization of the $LiYF_4/Eu^{3+}$ fluorescence spectrum, 271
laser-excited Eu(III) ion luminescence: sensitive and versatile probe of metal-ion–biomolecule interactions, 297
luminescence of divalent europium crown complexes in various solvents and at various temperatures, 147
magnetic circularly polarized luminescence (MCPL) spectra of $EuCl_3$ and $Eu(NO_3)_3$ in solution, 389
site selectively excited luminescence of Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215
Tb(III) and Eu(III) ions as sensitive probes in organic photochemistry, 363
Excitons
electron trapping, trapped excitons and the stability of divalent rare earth ions in host crystals, 297
Extraction
extraction of trivalent actinides and lanthanides by mixtures of HDDNS and crown ethers, 399

f elements
speciation of trivalent f elements in natural waters, 307
local density of f-element coordination compounds, 395
Films
hydrogen separation using $LaNi_5$ films, 83
Fluorescence
fluorescence dynamics in $LiYF_4:Er^{3+}$ and $LiErF_4$, 203
intensity parametrization of the $LiYF_4/Eu^{3+}$ fluorescence spectrum, 271
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
studies of Am^{3+} in aqueous solution, 301
Fluorescence line narrowing
fluorescence line narrowing: a competitive technique to EPR, 277
Fluoride glasses
comparison of laser properties of rare earths in oxide and fluoride glasses, 187
Fluorides
analysis of the spectrum of $Dy^{3+}:LaF_3$ assuming a C_{2v} site symmetry, 283
fluorescence dynamics in $LiYF_4:Er^{3+}$ and $LiErF_4$, 203
Fluoroarsenate and fluorophosphate glasses
time-resolved luminescence and decay characteristics of Gd^{3+} in fluoroarsenate and fluorophosphate glasses, 195
Fluoro complexes
formation of fluoro complexes of Tb^{3+} in hydrothermal solution at 200 °C and 100 bar, 400
Fourier transform–IR spectroscopy
FT–IR investigation of the interaction between dimethylsulphoxide (DMSO) and some lanthanide nitrates in acetonitrile solutions, 379
lanthanide-molecular interactions in solution studied by FT–IR spectroscopy, 402

Gadolinium
chemical and *in vivo* characterization of Gd chelates, 404
site selectively excited luminescence of Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215
study of the energy transfer processes in sensitized Gd phosphors, 139
time-resolved luminescence and decay characteristics of Gd^{3+} in fluoroarsenate and fluorophosphate glasses, 195
Glasses
comparison of laser properties of rare earths in oxide and fluoride glasses, 187
fluoride glasses as optimized materials for lanthanide luminescence and energy storage in Mn(II), 181
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
spectral studies of Pr(III) and Tm(III) in certain sulphate glasses, 227
spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glasses, 257
time-resolved luminescence and decay characteristics of Gd^{3+} in fluoroarsenate and fluorophosphate glasses, 195

Heating process
microstructure and coercivity of high iHc $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
Holmium
intensities in the nine-coordinate *mer*-complexes of Ho(III) in aqueous solution, 247
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Hydrofluorination
effect of high temperature hydrofluorination on some metallic and semimetallic impurities in the rare earth metals, 134
Hydrogenation
study of hydrogenation of $Gd_{64}Ga_{16}Ni_{20}$ by the XANES method, 135
Hydrogen separation
hydrogen separation using $LaNi_5$ films, 83
Hydroxides
precipitation incidence of the lanthanoid(III) hydroxides, 351
Hypochlorites
cryogenic luminescence studies of YOCl:Eu with the YOF-type and PbFCl-type structures, 175

Impurities
effect of high temperature hydrofluorination on some metallic and semimetallic impurities in the rare earth metals, 134
Intensity parameters
ab initio calculation of intensity parameters, 301
interaction and intensity parameters for Er(III) in certain acetate, nitrate and sulphate complexes, 233
Interaction parameters
interaction and intensity parameters for Er(III) in certain acetate, nitrate and sulphate complexes, 233
In vivo investigation
chemical and *in vivo* characterization of Gd chelates, 404
Ionic conductivity
ionic conductivity in $Na_2(R,Me)^{3+}\cdot M^{4+}P_3O_{12}$ crystals, 135
Iron
microstructural studies of ternary rare-earth–iron alloys, 107
solid solubility of La, Ce, Nd and Y in iron, 136
structural properties of $R_{1-x}Fe_4B_4$ compounds, 138
Iron and steel
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
physicochemical characteristics of rare earth elements in ironmaking and steelmaking, 73
review and prospects of the application of rare earths in iron and steel in China, 137
Isomerization
isomerization of tungstaenolate produced by the insertion of $W(CO)_6$ into a U–c multiple bond, 416

Kinetic properties
lanthanide(III)-aminopolycarboxylates: kinetic properties and ternary complexes, 395
Kinetic study
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155

Lamellar solids
excited-state properties of lamellar solids derived from hydrogen uranyl phosphate and lanthanon ions, 221
$LaNi_5$
hydrogen separation using $LaNi_5$ films, 83
Lanthanides
effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid, 300
fluoride glasses as optimized materials for lanthanide luminescence and energy storage in Mn(II), 181
role of the lanthanides in applied catalysis, 101
solvent extraction studies of La(III) and Nd(III) with ionizable macrocyclic ligands and thenoyltrifluoroacetone, 398
analysis of the spectrum of Dy^{3+}:LaF_3 assuming a C_{3v} site symmetry, 283
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
solid solubility of La, Ce, Nd and Y in iron, 136

Lanthanum telluride
thermal conductivity of $La_{3-x}Te_4$, 113
Laser excitation
laser-excited Eu(III) ion luminescence: sensitive and versatile probe of metal-ion–biomolecule interactions, 297
Laser properties
comparison of laser properties of rare earths in oxide and fluoride glasses, 187
Laser spectroscopy
laser spectroscopy of excited state resonances of rare earth ions, 298
Lithium
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
$LiYF_4$
fluorescence dynamics in $LiYF_4:Er^{3+}$ and $LiErF_4$, 203
$LiYF_4$/Eu
intensity parametrization of the $LiYF_4/Eu^{3+}$ fluorescence spectrum, 271
Luminescence
cryogenic luminescence studies of YOCl:Eu with the YOF-type and PbFCl-type structures, 175
effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid, 300
fluoride glasses as optimized materials for lanthanide luminescence and energy storage in Mn(II), 181
laser-excited Eu(III) ion luminescence: sensitive and versatile probe of metal-ion–biomolecule interactions, 297
luminescence of divalent europium crown complexes in various solvents and at various temperatures, 147
luminescence studies of adduct formation between $Tb[N(SiMe_3)_2]_3$ and various organic substrates, 419
site selectively excited luminescence of Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215
time-resolved luminescence and decay characteristics of Gd^{3+} in fluoroarsenate and fluorophosphate glasses, 195
Luminescence spectra
intense blue luminescence spectra and lifetimes of Tm(3+) in $POCl_3:SnCl_4$, 161
Lutetium
electronic Raman scattering in $Ce^{3+}/LuPO_4$, 302
site selectively excited luminescence of Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215

Magnetic activity
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Magnetic behaviour
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Magnetic circular dichroism
MCD of lanthanide diphthalocyanines, 305
Magnetic circularly polarized luminescence
magnetic circularly polarized luminescence (MCPL) spectra of $EuCl_3$ and $Eu(NO_3)_3$ in solution, 389
Magnetic order
long-range incommensurate magnetic order in Dy–Y multilayers, 53
Magnetic properties
dynamic ligand polarization contributions to $4f \rightarrow 4f$ magnetic dipole transition moments and rotatory strengths: $^7F_0 \rightarrow {}^5D_2$ and $^7F_2 \rightarrow {}^5D_0$ transitions in $Eu(oxydiacetate)_3^{3-}$, 251
intrinsic magnetic properties of compounds with the $Nd_2Fe_{14}B$ structure, 21
magnetic splitting factors for Stark levels in Nd oxychloride, 263
Magnetism
foundations of rare earth magnetism, 1
magnetism of $R_2Fe_{14}B$-based systems, 41
Magnets
coercivity in rare earth magnets, 133
Manganese
fluoride glasses as optimized materials for lanthanide luminescence and energy storage in Mn(II), 181
Matrices
determination of Ce, Eu and Tb in rare earth matrices by DCP–AES, 291
Metal-binding sites
direct evidence of three different metal-binding sites in α-lactalbumine, 401
Metallocenes
electron transfer chemistry of divalent metallocenes, 415
Microdistribution
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
Microstructure
microstructure and coercivity in high iHc $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys:

in situ observation of the heating process with a 1000 kV high-voltage electron microscope, 134
Microstructural studies
microstructural studies of ternary rare-earth–iron alloys, 107
Mixed ligand complexes
mixed ligand complexes of lanthanides with macrocyclic and open-chained polyamino-polycarboxylic acids and acetylacetone, 397
Multilayers
long-range incommensurate magnetic order in Dy–Y multilayers, 53

Natural waters
speciation of trivalent f elements in natural waters, 307
$Nd_2Fe_{14}B$
electronic structure calculation on rare earth iron boron intermetallic compounds, 138
intrinsic magnetic properties of compounds with the $Nd_2Fe_{14}B$ structure, 21
magnetism of $R_2Fe_{14}B$-based systems, 41
microstructure and coercivity in high iHc $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
$R_2Fe_{14}B$ materials: a new era in permanent magnets, 137
substituent effects in $Nd_2Fe_{14}B$-based alloys interpreted on a crystal field model, 35
Neodymium
energy levels of Nd^{3+} and Eu^{3+} in zircon- and monazite-type structures, 302
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
magnetic splitting factors for Stark levels in Nd oxychloride, 263
solid solubility of La, Ce, Nd and Y in iron, 136
solvent extraction studies of La(III) and Nd(III) with ionizable macrocyclic ligands and thenoyltrifluoroacetone, 398
spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glasses, 257
Neptunium
synthesis and cyclic voltammetric study of bis(pentamethylcyclopentadienyl) neptunium dichloride, 411

Nitrates
complexation differences between lanthanide nitrates from spectroscopic measurements in water, 315
FT–IR investigation of the interaction between dimethylsulphoxide (DMSO) and some lanthanide nitrates in acetonitrile solutions, 379
ultrasonic relaxation investigations of Th nitrate in water, 323
Nuclear magnetic resonance
interpretation of the magnetochemical, EPR and NMR spectroscopic properties of adducts derived from tris(cyclopentadienyl)lanthanide(III), 304

Oligomerization
effect of oligomerization on the solvent water proton longitudinal relaxation rates of lanthanide EDTA complexes, 339
Optical activity
anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers, 402
Optical hole-burning spectroscopy
correlation of structural and optical properties of rare earth activated materials using optical hole-burning spectroscopy, 298
Optical properties
correlation of structural and optical properties of rare earth activated materials using optical hole-burning spectroscopy, 298
Optical signature
optical signature of an incommensurate structure in the $ThCl_4$:Pr^{3+} system, 303
Organic photochemistry
Tb(III) and Eu(III) ions as sensitive probes in organic photochemistry, 363
Organometallics
lanthanoid metals in unusual coordination environments: implications for organic, organometallic and inorganic chemistry, 416
synthesis and disproportionation of mixed ligand Yb organometallics involving cyclopentadienyl and β-diketonato chelate ligands, 417
Oxidation studies
oxidation studies of selected lanthanides in acetonitrile, 371
Oxide glasses
comparison of laser properties of rare earths

in oxide and fluoride glasses, 187

Periodic table
main types of phase diagrams for rare-earth–X systems and their correlation with the periodic table, 121
Permanent magnetism
rare-earth–transition-metal–boron permanent magnets with smaller temperature coefficients, 95
Permanent magnets
recent developments in permanent magnet materials, 133
$R_2Fe_{14}B$ materials: a new era in permanent magnets, 137
Phase diagrams
main types of phase diagrams for rare-earth–X systems and their correlation with the periodic table, 121
Phonon-assisted energy transfer
identification of the mechanism for phonon-assisted energy transfer, 299
Phonon interference
phonon interference in the analysis of rare earth $4f^n$ energy level sequences, 239
Phosphates
electronic Raman scattering in $Ce^{3+}/LuPO_4$, 302
electronic Raman scattering in rare earth phosphates, 303
excited-state properties of lamellar solids derived from hydrogen uranyl phosphate and lanthanon ions, 221
ionic conductivity in $Na_2(R,Me)^{3+}M^{4+}P_3O_{12}$ crystals, 135
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
Phosphors
study of the energy transfer processes in sensitized Gd phosphors, 139
Platinum
magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3, 89
Positron–electron penetration
positron–electron penetration in rare earths, 135
Praseodymium
ab initio calculation of crystal-field correlation effects in Pr^{3+}–Cl^-, 301
electronic relaxation of $^3P_0$ and $^1D_2$ states of Pr(3+) in $POCl_3$:$SnCl_4$, 169
optical signature of an incommensurate structure in the $ThCl_4$:Pr^{3+} system, 303
spectral studies of Pr(III) and Tm(III) in certain sulphate glasses, 227
spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glasses, 257
Preparation
preparation of elements and alloys, 133
Pseudocontact shifts
comparison of the lanthanide-induced pseudocontact shifts in some seven, eight, and nine-coordinated lanthanide complexes, 399

Radioassay
determination of the alloyed amount of Ce and microdistribution of Ce in steel, cast iron and Al by radioassay and autoradiography, 63
Raman scattering
electronic Raman scattering in $Ce^{3+}/LuPO_4$, 302
electronic Raman scattering in rare earth phosphates, 303
Reactivity
synthesis and reactivity of divalent organosamarium complexes, 415
Relaxation rates
effect of oligomerization on the solvent water proton longitudinal relaxation rates of lanthanide EDTA complexes, 339
Rotatory strengths
dynamic ligand polarization contributions to $4f \rightarrow 4f$ magnetic dipole transition moments and rotatory strengths: $^7F_0 \rightarrow {}^5D_2$ and $^7F_2 \rightarrow {}^5D_0$ transitions in Eu(oxydiacetate)$_3^{3-}$, 251

Samarium
CPL of Sm(III): comparison of experimental and calculated emission (CPL and TL) spectra of $Na_3[Sm(ODA)_3]\cdot 2NaClO_4\cdot 6H_2O$, 303
electronic structure of $Sm(DBM)_3\cdot H_2O$, 302
microstructure and coercivity in high *iHc* $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope, 134
synthesis and reactivity of divalent organosamarium complexes, 415
thermal stability studies of dicyclopentadienyl samarium acetate and halides, 405
Silicates
site selectively excited luminescence of

Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215
Solid solubility
solid solubility of La, Ce, Nd and Y in iron, 136
Solid state
solid state and solution structures of the lanthanide (2.2.1) cryptates, 400
Solubilities
rare earth fluoride solubilities, complex formation and thermodynamic functions for the solution process, 401
Solvent extraction
solvent extraction studies of La(III) and Nd(III) with ionizable macrocyclic ligands and thenoyltrifluoroacetone, 398
use of cetyltrimethylammonium bromide in the solvent extraction of lanthanoid complexes of Bromopyrogallol Red and spectrophotometric determination of lanthanoids, 398
Speciation
speciation of trivalent f elements in natural waters, 307
Spectroscopy
recent advances in the dynamic and static spectroscopy of rare earth ions in insulators, 299
spectroscopic studies of the interaction of adriamycin with lanthanide(III) ions, 400
Splitting factors
magnetic splitting factors for Stark levels in Nd oxychloride, 263
Stability
effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid, 300
Stark levels
magnetic splitting factors for Stark levels in Nd oxychloride, 263
Structural properties
correlation of structural and optical properties of rare earth activated materials using optical hole-burning spectroscopy, 298
structural properties of $R_{1+x}Fe_4B_4$ compounds, 138
Structure
effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid, 300
Substituent effects
substituent effects in $Nd_2Fe_{14}B$-based alloys interpreted on a crystal field model, 35
Sulphate glasses
spectral studies of Pr(III) and Tm(III) in certain sulphate glasses, 227
Synthesis
divalent lanthanoid synthesis in liquid ammonia. III: the synthesis and X-ray crystal structure of $(C_8H_8)Yb(C_5H_5N)_3\frac{1}{2}C_5H_5N$, 418
synthesis and properties of the complexes of rare earths(III), bidentate heterocyclic amine ligands and trichloroacetic acid, 403
synthesis and reactivity of divalent organosamarium complexes, 415
synthesis of dicyclopentadienyl Yb benzoate derivatives, 418
synthesis and cyclic voltammetric study of bis(pentamethylcyclopentadienyl) neptunium dichloride, 411
synthesis and disproportionation of mixed ligand Yb organometallics involving cyclopentadienyl and β-diketonato chelate ligands, 417

Terbium
determination of Ce, Eu and Tb in rare earth matrices by DCP–AES, 291
electron and energy transfer processes of excited states of Eu(III) and Tb(III) aquo ions and cryptates, 329
formation of fluoro complexes of Tb^{3+} in hydrothermal solution at 200 °C and 100 bar, 400
luminescence studies of adduct formation between $Tb[N(SiMe_3)_2]_3$ and various organic substrates, 419
Tb(III) and Eu(III) ions as sensitive probes in organic photochemistry, 363
Thermal conductivity
thermal conductivity of $La_{3-x}Te_4$, 113
Thermal stability
thermal stability studies of dicyclopentadienyl samarium acetate and halides, 405
Thermodynamics
rare earth fluoride solubilities, complex formation and thermodynamic functions for the solution process, 401
Thin films
zinc sulphide thin films doped with rare earth ions, 209
Thorium
optical signature of an incommensurate structure in the $ThCl_4:Pr^{3+}$ system, 303

recent developments in organothorium and organouranium chemistry, 417
ultrasonic relaxation investigations of Th nitrate in water, 323
Thulium
spectral studies of Pr(III) and Tm(III) in certain sulphate glasses, 227
spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glasses, 257
intense blue luminescence spectra and lifetimes of Tm(3+) in $POCl_3$:$SnCl_4$, 161
Total luminescence
CPL of Sm(III): comparison of experimental and calculated emission (CPL and TL) spectra of $Na_3[Sm(ODA)_3]$ $2NaClO_4 6H_2O$, 303
Transfer
kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses, 155
Transition moments
dynamic ligand polarization contributions to $4f \rightarrow 4f$ magnetic dipole transition moments and rotatory strengths: $^7F_0 \rightarrow {}^5D_2$ and $^7F_2 \rightarrow {}^5D_0$ transitions in Eu(oxydiacetate)$_3^{3-}$, 251
Tungstaenolate
isomerization of tungstaenolate produced by the insertion of $W(CO)_6$ into a U–C multiple bond, 416

Ultrasonic relaxation
ultrasonic relaxation investigations of Th nitrate in water, 323
Unusual coordination environments
lanthanoid metals in unusual coordination environments: implications for organic, organometallic and inorganic chemistry, 416
Uranium
excited-state properties of lamellar solids derived from hydrogen uranyl phosphate and lanthanon ions, 221
isomerization of tungstaenolate produced by the insertion of $W(CO)_6$ into a U–C multiple bond, 416
recent developments in organothorium and organouranium chemistry, 417

Voltammetric study
synthesis and cyclic voltammetric study of bis(pentamethylcyclopentadienyl) neptunium dichloride, 411

Woollen yarn
exploration of the function of rare earths in the dyeing of woollen yarn, 357

X-ray absorption near-edge structure
study of hydrogenation of $Gd_{64}Ga_{16}Ni_{20}$ by the XANES method, 135
X-ray crystallography
divalent lanthanoid synthesis in liquid ammonia. III: the synthesis and X-ray crystal structure of $(C_8H_8)Yb$ $(C_5H_5N)_3\frac{1}{2}C_5H_5N$, 418

Ytterbium
divalent lanthanoid synthesis in liquid ammonia. III: the synthesis and X-ray crystal structure of $(C_8H_8)Yb$ $(C_5H_5N)_3\frac{1}{2}C_5H_5N$, 418
electron transfer chemistry of divalent Yb metallocenes, 415
synthesis and disproportionation of mixed ligand Yb organometallics involving cyclopentadienyl and β-diketonato chelate ligands, 417
synthesis of dicyclopentadienyl Yb benzoate derivatives, 418
Yttrium
cryogenic luminescence studies of YOCl:Eu with the YOF-type and PbFCl-type structures, 175
long-range incommensurate magnetic order in Dy–Y multilayers, 53
site selectively excited luminescence of Eu^{3+} in Gd, Y and Lu oxyorthosilicates, 215
solid solubility of La, Ce, Nd and Y in iron, 136

Zinc sulphide
zinc sulphide thin films doped with rare earth ions, 209
